T R E W, Christoph Jacob - German Physician and Botanist

B. April 26, 1695. Lauf nr. Nuremberg
D. July 18, 1769. Nuremberg

Wrote a great number of important works on botanics and on rare plants. In his writings he also dealt with subjects of physics. His "PLANTAE SELECTAE ..." contains the famous Ehret-Plates with excellent reproductions of plants. He left his library of ab. 34000 vol., his collection of physical instruments and his rich Herbarium to the University of Altdorf.
